Change Mind to Change Reality!

Etiology / Origin

The Constant Silent Speech of our Subconscious Mind; whispering:

You have ...

Rare disease, defect, limitation, no medicine, little money ...

You are ...

Alien, inadequate, guilty, limited, victim ...

Mechanism of Action

Accumulation of negative thoughts and emotions over time inhibit our minds and lead subconsciously to self destructive attitude, lock our body's natural sources of energy, and block the factor receptors and make factor replacement useless.

Spontaneous bleeds seem to be the final product of our spiritual and mental **dis-ease**, they are telling us that there is a conflict or something wrong in the way we are thinking and feeling.

FINDINGS

Hemophilia is in Mind not in Body!

RECOMMENDATIONS

- **If you want to live healthy without Hemophilia**, you have to let the friendship among your mind, soul and body comes true; the Three must be in **One!**
- **Factor does not do its work alone**; the permission of Mind is a Must.
- **Change *MIND* to Change *REALITY* !**
